3rd Generation Artificial Intelligence METACONE

By focusing on 3rd wave artificial intelligence, Metacone will focus on having the ability to learn with its own algorithms, much more similar to how humans learn, rather than being improved with a high number of labeled training data. It will both decrease the need for big data sets and fix the problem of misleading training data. The signs of progress in computer technologies will be a base for new signs of progress in this area and will be helpful for the growth of Metacone.

Metacone

1 Raise virtual baby with 3rd wave AI.

2 To develop virtual babies' intelligence, buy memory with coin.

3 Make the babies that you teach your assistant. Let the assistants earn you coins.

4 Get coin in Metaverse universes with miner AI Assistants.

Metacone

UTOPIA

1 Discover the power of Metacone algorithms.

2 Have a virtual baby that grows up with you.

3 Combine blockchain technology with real intelligence.

4 Make investment to the future from now.

Metacone

PRODUCT

About Us: To apply the technologies of the future to the present and to make them commercially available.

Token features: It will be the 3rd generation artificial intelligence currency. To get advanced artificial intelligence features, this token will be required.

To make virtual babies into assistants by gaining intelligence features.

THE COINS THAT CAN BE USED IN MINING WILL BE PRODUCED IN THE 1ST QUARTER OF 2025.

Metacone

TIMING

Cause 1
The need for
autonomous systems
with the rise of metaverses

Cause 2
Artificial intelligence will
begin to replace value-added
engineering jobs

Metacone

SITUATION

Our company has started to build token ecosystems and continues to verify and improve the workability of demo algorithms.

Metacone token is produced from the 3.5 billion Solana ecosystem. 15% will be offered for sale on different exchanges as a pre-sale totally.

Metacone will keep its 20% always. They have partners in England, Canada and Turkey.
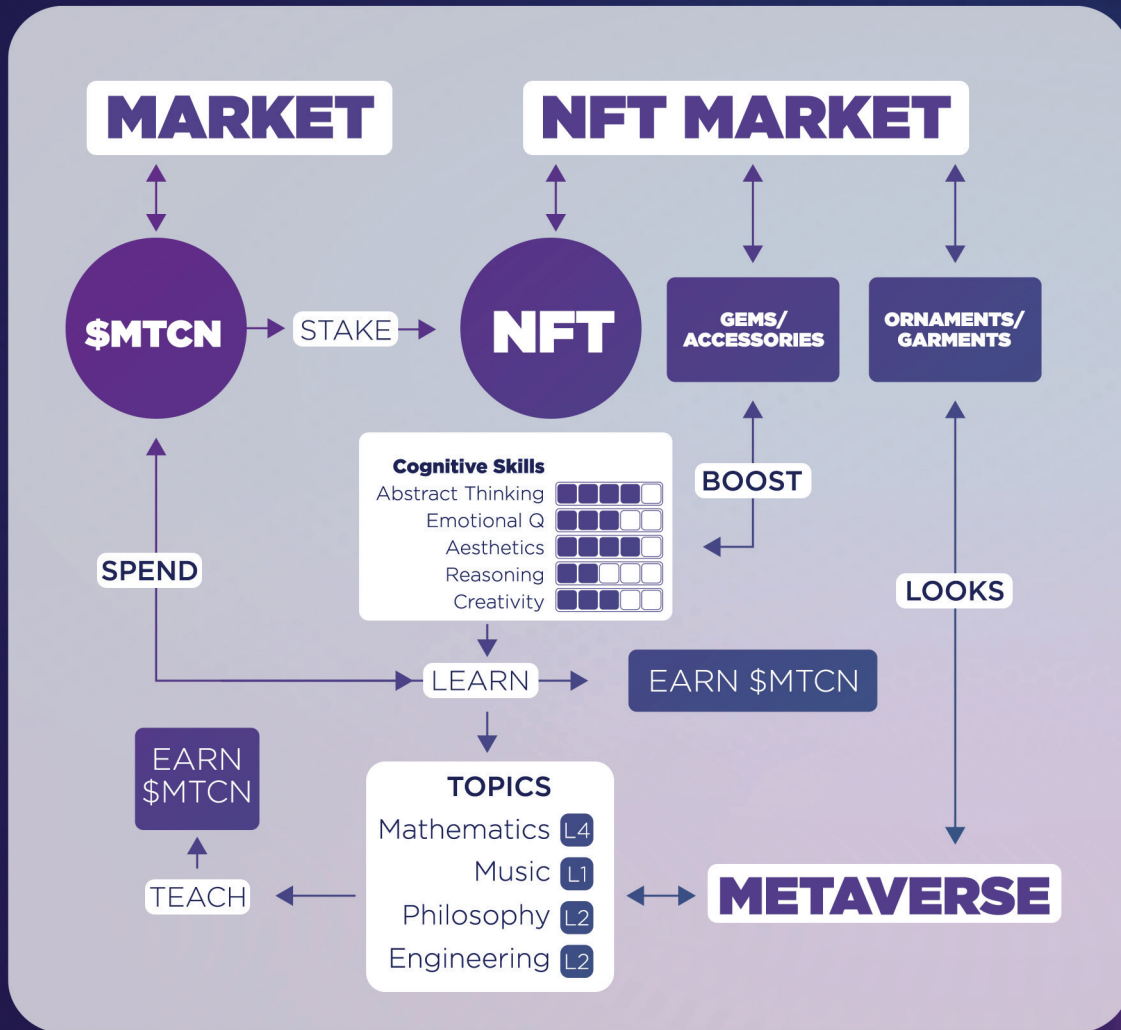

Metacone

NFT - STAKE

Users start with a baby AI in the app on their phone, which is ready to learn whatever the user wants to teach. The baby AI will be sold as an NFT. Each NFT will come with innate cognitive abilities like reasoning, abstract thinking, EQ etc. Each NFT's learning rates and capacities will be defined based on these predefined capabilities. There will be different ways to increase these capabilities by adding some accessories to the NFT on a limited basis.

NFTs will be distributed to users as a result of 6-month stakes of $1500 for NFT. NFT for 10% will be distributed randomly with a stake of $150.

For the next 6 months, MTCN will be staking, giving them extra powers with accessory NFTs.

NFTs will be able to be traded between users at the end of the 6th month.

Metacone

TOKENOMICS

The birth of NFTs is an important milestone. Beside NFTs earned with the stake, we will also be releasing some NFTs for new users to mint. A few days after that, all NFTs will be revealed and users will see what cognitive skills their NFTs are born with. 6 months after NFTs are released, they will be functional and the application will be ready to use. Users will carry their NFTs with them on their phones and they will spend some time training their baby AI.

Metacone

TOKENOMICS

For pre-investment tour %5, 175,000,000 tokens
0.005 $ = 875,000.00 $

For special tour 5%,
0.007 $ =1,225,000 $

Total with $2,100,000 initial investment it will be released

For open market %5 175,000,000 token
0.008 $ = 1400,000 $

Metacone

Mobile Game
Fun, spend-time and communication tool

Metaverse Financiers
Blockchain financiers who are already investing in the future, NFT financiers

Mobile Advertisement
Advertisement incomes

Artificial Intelligence Financiers
Financiers who believe in the future of 3rd generation artificial intelligence

Coin Market
Metaverse gamers, people who need assistant, people who want to spend time in their spare time for fun.

Metacone

Social Media

Twitter, LinkedIn and YouTube will be used actively and education videos will be posted.

Attendance to Artificial Intelligence and Expo Events

Attending artificial intelligence events and presentations will be made at Expo events.

E-Mail Marketing

Information messages which contain promotions and production developments will be delivered without spam.

Search Engine Optimization

Different campaigns will be launched to stand out in text-based and graphic display to stand out in search engines.

Marketing Plan

By using YouTubers through social media, scientific educations will also be given, working with futurists will be made.

Metacone

Competition Advantages

Advantage 1
The algorithm that we have developed

Advantage 2
Being the first in sector

Advantage 3
Providing harmony to metaverse universes, providing suitable

Advantage 4
To increase the value of mining (software mining)

Disadvantages

Disadvantage 1
Promotion, customer training

Disadvantage 2
Lack of server infrastructures

Threats

Threat 1
The existence of gaps and uncertainties in the current regulatory regime of crypto assets, blockchain technologies, ICO/IEOs, and cryptocurrency exchanges

Metacone

INCOME MODEL

The advertisements of virtual babies in the mobile application

Token payments to meet database needs through virtual babies

Payments of miner AI's through coin

Our main income model will be the incomes that come from token economy. Additional features that in mobile applications will be sold through token, users who buy these features will get advantages.

Selling dolls developed by Metacone through NFT Users who run their computers by setting up the Metacone network will obtain Metacone coins, those who use this network will pay Metacone coins.

Metacone

CEM KADİR ŞAHİN

CEO / Electrical electronics engineer. Experience in electronic and software sector for 15 years and develops algorithms about general artificial intelligence. Besides being in entrepreneurship ecosystem for a long time, he has a great addition in many designs and products.

KEREM SAVAŞ

Co-founder / Electrical electronics engineer. Experience in communication and information technologies for 15 years. He carries out 5G, artificial intelligence, machine learning and big data projects in Beyes Bilişim, which he is the founder of.

MUTLU KAPLAN

Co-founder / Security / Software engineer. Experience in software sector for 15 years. He is the founder of the UK-based company StackGate, which he is an entrepreneur, established and managed the software infrastructures of large projects.

Metacone

our Team

MERT TÜMER
Software engineer / computer engineer, experience in software sector for 10 years.

GÖKBERK ERDEM AKALIN
Software engineer / computer engineer, experience in software sector for 10 years.

AHMET YILDIRIM
Design / Electrical electronics engineer, experience in electronic sector for 15 years.

GÖZDE ÖZKAN
Computer engineer/business analyst, experience in the electronic sector for 5 years.

ŞEVVAL R. TÜYSÜZ
Business Development Manager

Metacone

MURAT ÜNSAL

Ecosystem Manager

BENGİSU ARDA

Designer, experience in the advertising sector for 5 years.

AYÇA DENİZ

Marketing Specialist

İBRAHİM KARGILI

Experience in corporate marketing for 20 years.
